Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 2, 2004 has been entered. Claims 1,2 were amended. Claims 3-9 were added.

2. The text of those sections of Title 35, U.S.C. code not included in this action can be found in the prior Office Action issued on July 30, 2003.

Claim Rejections - 35 USC § 112

3. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a power source composed of two rectangular parallelepiped batteries as shown in Figures 1 and 2, does not reasonably provide enablement for more than 2 batteries in the system. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

Applicant's principle arguments are

Features cited in claims 1 and 7 are not taught nor suggested in the prior art.

In response to Applicant's arguments, please consider the following comments.

The instant disclosure teaches a power source having two batteries 1a and 1b connected in series. See page 7, lines 15-17, Figures 1 and 2. It does not teach or suggest a power source comprising at least two rectangular parallelepiped batteries.
